October 25, 26, 27

Documents Due

March 29

May 10

June 7

July 12

September 13

October 11

When organizing the piles, please keep in mind that each pile needs to be picked up and carried or dragged to the chipper. It is easier if the piles are separated rather than one long continuous row.

Also, keep rows to a single height. You can run a second or third row behind the one prior; again, please

Keep in mind that a person has to get to the pile and literally pick it up. Having piles spread over a distance is ok, the chipper can be moved. A flat open, safe location, along the driveway or safe road way

Is preferred.
